Global Commercial Vehicle
Drive to Zero (Drive to Zero)

Website: https://globaldrivetozero.org/

Host organization  CALSTART
Mode covered  Road
Region  North America, Europe, China, India, Latin America.

Objective
Drive to Zero aims to accelerate the growth of global zero-emission (ZE) commercial vehicles, with the vision that ZE technology will be commercially viable by 2025 and dominate by 2040 in specific vehicle segments and regions.

Benefits of this initiative
Drive to Zero pledge partners become part of a global network of stakeholders committed to advancing zero-emission technology for commercial vehicles, and have first access to the latest developments through our publications, tools, newsletters, webinars, meetings and events.

How to engage
Signing the pledge, and participating in Drive to Zero’s events and projects.

General Pledge
Please see https://globaldrivetozero.org/about/pledge/.

Related policy or advocacy work
Drive to Zero pledge partners can also endorse the Global Memorandum of Understanding on zero-emission medium- and heavy-duty vehicles (ZE-MHDVs), where leading countries strive for achieving 30% ZE-MHDV sales by 2030, and 100% by 2040. To endorse the Global MOU, please visit: https://globaldrivetozero.org/mou/endorsement/.
